Part I: Ranked images and corresponding score maps for Pascal VOC 2012 object classification test set

In this document we show example images from Pascal VOC 2012 test set sorted by the decreasing score of the convolutional neural network *object classifier* for the 20 Pascal VOC object classes. Note that only every 10th image (when sorted by the decreasing value of the classifier score) is shown. For each image and class C we also show its score map with red colors indicating high values of the class C classifier. Note the correspondence of peaks in score maps with locations and scales of objects in images.
