A Wavelet Tour of Signal Processing
Stéphane Mallat, Academic Press 1999 (2nd edition)

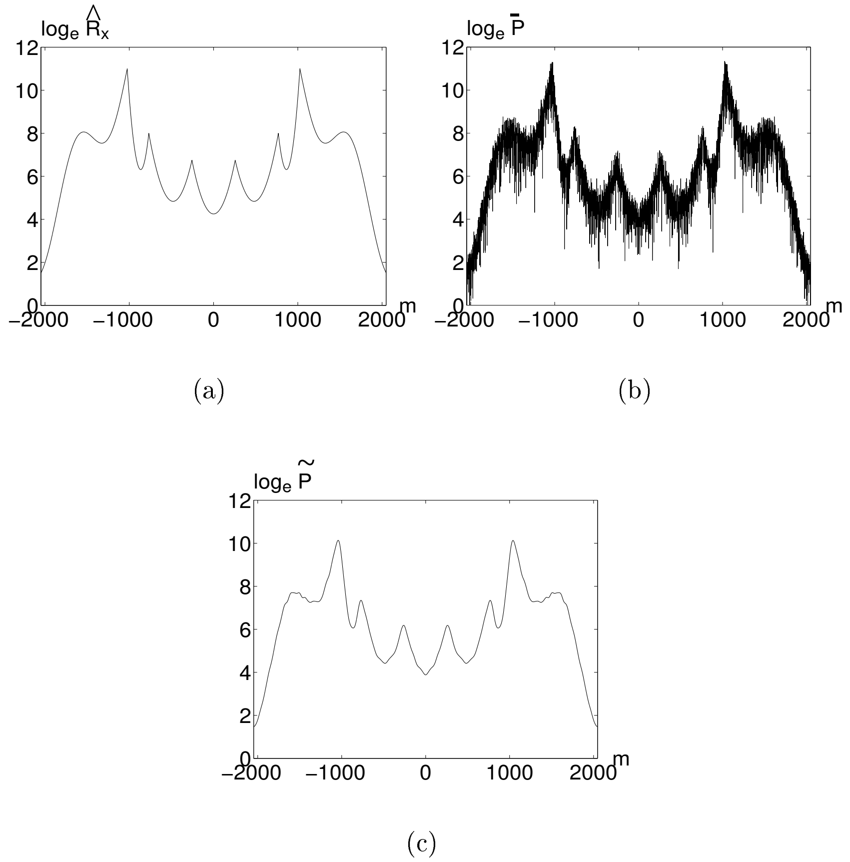

Figure 10.18: (a): Log power spectrum $\log_e \hat{R}_X[m]$ of a stationary process $X[n]$. (b): Log periodogram $\log_e \bar{P}[m]$ computed from $L = 1$ realization. (c): Linearly regularized estimator $\log_e \tilde{P}[m]$.
